

Oleksandr Wojtyla

Web Developer

Web developer with hands-on experience from a 6-month internship as a Node.js developer, with a focus on Node.js backend, JavaScript frameworks, and creating responsive user interfaces with TypeScript, Angular and React. Providing reliable solutions while keeping modern development standards and clean code principles.

Work experience

Node.js Developer Internship

Solv'd, Inc, Mar 2024 - Oct 2024

Mastering Node.js and JavaScript, SQL and No SQL databases. Creating personal and group projects build in Node.js, Express and TypeScript.

Recent Projects

Multiplayer Game "Alias"

Led an intern team during the development of a group project "Alias" as part of an internship program:

- **Tech Stack:** Node.js, TypeScript, Express, MongoDB, Handlebars, Socket.IO for real-time gameplay and communication.
- **Core Features:** Developed real-time multiplayer functionality, live chat, automated word validation, and seamless player synchronization.
- **Leadership Role:** Oversaw project planning, task delegation, and code reviews, ensuring high-quality delivery within deadlines.

Employee Time Management System (freelance)

Designed and build a full-stack employee time management system. Includes:

- admin web panel (React, Material UI, Tailwindcss);
- employee web app (React, TypeScript, Material UI, ModuleCSS);
- REST API (Node, Express, MongoDB);
- android app (React-native, TypeScript, MongoDB realm).
